

A career now!

WERTHMANN® is the first franchise on the territory of Germany in the field of photovoltaic module cleaning.

As member of the German Franchise Association, we prepare our partners using the wide experience that we have accumulated along the years, in terms of high-quality, professional, economic cleaning, preserving the warranty of the photovoltaic modules.

You must not be an expert in photovoltaic systems, the system is suitable for those who are new in this field.

Start right now! You benefit from a business concept well established on a future-oriented market.

Why photovoltaic system cleaning?

Photovoltaic equipment must be cleaned every 5–6 years (the residential ones), others even annually (farms, railways stations nearby).

Therefore, in order to maintain the performance values of the systems and to be able to maintain the existing refinancing plan, modules must be cleaned.

Are you the right person for a franchise partnership?

Do you like to work with your own hands, have you been wishing for a long time to be your own boss and to enjoy a fully rising profitable franchise system?

Our partners are providing cleaning services with professional assistance, that **WERTHMANN®** benefits from as franchiser.

Daniela Fröhlich
Franchise manager
and our first partner

Due to many years of experience in the field of photovoltaic cleaning on the entire territory of Germany, we know that every roof is different and that it requires different procedures and machines. Therefore, we usually have on board six different cleaning devices to clean systems at a high quality standard and so that we should not expose them to deteriorations caused by unsuitable works. We do not use cleaning robots out of principle, because, at present, we don't have any knowledge about a device that would not damage the equipment.

Our high-performance machines use membrane filters, limestone, chlorine and resin filters, thus producing pure water that removes dirt off the modules and that dries them without leaving any traces. If you decide to become our partner, you will be provided with the most modern all-road sprinters manufactured by Mercedes, towing systems and state-of-the-art machines, to become a professional cleaning service provider for photovoltaic systems.
